

DATA FORM

MODIFIED ROUTINE ON SITE DETERMINATION METHOD

Field Investigator: See Data Date:
Project/Site: County: State:
Applicant/Owner: Farm #1 Surveyor:
Describe current conditions of wetland and surrounding areas: Wetland area in brush upslope of ditched stream
Has the vegetation, soils, and/or hydrology been significantly disturbed? Yes No X
If yes, what are modifiers:

SOILS

Mapped Series: 44-Ragnar fine sandy loam 0-16" to slopes
Hydric soils list?: Yes No X
Depth Horizon Color Texture Hydric Inclusion?
Hydric Soil Indicators Yes No Depth
Histosol X 0-16"
Histic Epipedon X
Gleyed X
Sulfidic odor X
Concretions X
Is the hydric soil criterion met? Yes X No
Rationale: Soil is organic or a histosol w/ a sulfidic odor.

HYDROLOGY

General wetland type or characteristic: Emergent X Scrub/Shrub X Forested
Permanently flooded Seasonally flooded X Temporarily flooded Saturated
Types of water bodies associated with the wetland: River Stream X Seep/Spring
Pond/Lake Tidal Drainage ditch/channel Other:
Is the ground surface inundated? Yes No X Surface water depth:
Is the soil saturated? Yes X No Depth to water in test hole: moist
Field evidence of surface inundation or soil saturation: moist but no water in hole - heavy oxidized root channels
Is the wetland hydrology criterion met? Yes X No
Rationale: Hydrology present as soil saturation

SUMMARY

Hydric soil present? Yes X No Hydrology present? Yes X No
Hydrophytic vegetation present? Yes X No
Percent of FAC, FACW, and OBL species: 100%
Is the site a wetland? Yes X No
Rationale: Positive indicators present for all three wetland parameters

TEST HOLE # 2 OF 8

LOCATION OF TEST HOLE Wetland near WBZ
